

YEH CHIN HSIEN

Game Designer

+86 155 1007 9686 or +65 84110160 | 15510079686@163.com |

Portfolio: <https://lecter1007.github.io/Portfolio.github.io/chinhsien-yeh-portfolio-new/>

PROFILE

Game designer with hands-on experience across commercialization design, live-ops, and game economy analysis for mobile titles, plus five self-driven and team game projects spanning card games, VR serious games, and survival RPGs. Combines data-informed design (Python/MySQL player-behavior analysis) with strong genre literacy from 20+ mobile titles and 15+ PC titles studied in depth. Incoming MSc candidate in Game Design at Nanyang Technological University.

WORK EXPERIENCE

Game Commercialization Designer

Jul 2025 – Dec 2025

Leniu Game — Guangzhou, China

- Supported live-ops and commercialization design for three mobile titles (Nine Spirits Shenyu, Everlasting Seal, and Tale of Wind), designing in-game commercial activities and coordinating with UA, QA, and engineering teams.
- Owned the replacement and iteration of in-game event items for Nine Spirits Shenyu, working directly with product and tech stakeholders on rollout.
- Used Python and MySQL to analyze player behavior data and inform player-experience optimization proposals.
- Produced competitive intelligence reports by playtesting and benchmarking rival titles to guide design decisions.

Game Operations Intern

Sep 2024 – Nov 2024

Unity — Beijing, China

- Assisted small and mid-size game studios in optimizing commercialization strategy as a publishing and operations representative.
- Tracked player behavior via in-game telemetry and designed post-launch monetization events for a live platform.

Game Event Planning Intern

Jul 2024 – Sep 2024

Sohu Changyou — Beijing, China

- Supported the launch of new products, monitoring newly released titles on Steam and conducting competitive research.
- Analyzed player data and reviews to identify pain points; ran playtests and delivered system-breakdown and player-experience reports.

GAME DESIGN PROJECTS

Vampire vs. Werewolf *Solo Project · Unity · 2024*

Turn-based 4-player card game where players infer opponents' identities through deck composition and card play, using a high-card-wins scoring system.

Who Are You *Team Project · Lead Designer + Systems Designer · Unity · 2026*

First-person horror puzzle game. Designed a cross-floor item-transfer mechanic that drives puzzle-solving, with scattered clues that reconstruct the game's backstory.

Nowhere to Go *Team Project · Systems & Level Designer · Unity · 2024*

First-person VR serious game about climate change. Players take on the role of a village chief whose choices shape residents' lives and the island's fate.

Chill Quest for Survival *Team Project · Systems Designer · Unreal Engine 5 · 2024*

Polar-themed first-person survival RPG in which players act as a rescuer braving a blizzard to save trapped survivors.

Champion Kitchen 325 *Solo Project · Unity · 2026*

Turn-based card "idle-cook" game set in the Arknights universe; players build and combine card sets for high-value combos.

Cyberpunk: Neon Salvage *Solo Project · UI/UX Design · 2026*

GUI design for a turn-based card game with a cyberpunk visual theme.

GAME RESEARCH & PLAYER INSIGHT

Maintains an ongoing log of competitive analysis across 20+ mobile and 15+ PC titles, including deep, multi-year play of

Onmyoji (5 yrs), Arknights (4 yrs), and Reverse: 1999 (2 yrs) with teardown notes on gacha, progression, and social systems; plus system breakdowns of Cyberpunk 2077, Balatro, Detroit: Become Human, Slay the Spire, and Inscryption.

OTHER EXPERIENCE

Guest Participant, Tencent Planning & Operations Open Course Aug 2025 – Oct 2025

- Completed a 7-week program on game operations and planning; analyzed the brand-building and marketing strategy of Reverse: 1999.

Head of Social Media, CUC Student Union Jul 2021 – Nov 2023
Communication University of China

- Led the design/copy team for the student union's cross-platform social media account (6,000+ followers), overseeing content production and review; grew average views to 3,000+ per post, with the top original post reaching 10,300 views.

EDUCATION

MSc in Game Design, Art and Technology 2026 – 2027
Nanyang Technological University, Singapore

BA in Digital Media Arts (Network & New Media) 2021 – 2025
Communication University of China

SKILLS

- Game Design: systems design, mechanics design, competitive analysis, player-experience analysis, commercialization/monetization design, prototyping
- Engines: Unreal Engine 5, Unity, Godot
- Data & Analytics: Python, MySQL, player-behavior data analysis
- Design & AI Tools: Figma, Photoshop, Illustrator, After Effects, ComfyUI
- Languages: Mandarin (native), English (IELTS 6.5; CET-6 535; CET-4 High Pass)

AWARDS

- 3rd Prize, AIGC Creative Track — China Collegiate Computing Contest (2024)
- Overseas Chinese Scholarship (Hong Kong/Macau/Taiwan), 3rd Class — Communication University of China (2024)
- Provincial Award, Beijing Region — China "Internet+" College Students' Innovation and Entrepreneurship Competition (2023)
